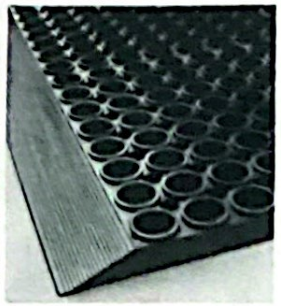
SAFETY BEGINS WITH A HAZARD-FREE FLOOR!

The NATIONAL SAFETY COUNCIL says . . .

"From the safety engineer's standpoint we know that continued standing on a hard floor causes discomfort, fatigue and loss of efficiency. For that reason it is a good practice to provide relief which may be in the form of . . . mats or other floor surfaces that are less hard on the feet. ▪ It is recommended that mats be used at entrances to minimize the slipping hazard even where the walking surface is tile or terrazzo containing abrasive. The use of mats also helps to reduce the amount of moisture which may be tracked into the building during bad weather. Where the surface slopes, mats are essential. Mats must be of a kind that do not in themselves present tripping hazards. ▪ The effect of excessive noise on employees should also be considered since noise is a known factor of fatigue. Rubber mats have been used to lessen the amount of noise on certain types of flooring. These mats also protect the flooring surface."

K DRAIN MATTING I (#A662)

Mfg. by TEKNOR APEX



The non-slip surface gives positive footing even under extreme spillage conditions. Round holes with raised gripping edges provide continuous scraping action preventing hazardous build-ups underfoot. Used in institutional kitchens, restaurants, behind bars and food preparation tables.

AVAILABILITY: ⅞" thick.	WEIGHT
19½" x 39"	12.5 lbs.
29¼" x 39"	19 lbs.
39" x 39"	25 lbs.
58½" x 39"	38 lbs.

COLORS: Black or Brown.

CONSTRUCTION DETAILS: Grease resistant, rubber with a raised gripping edge. Anti-fatigue matting with nipples on the bottom for even support. The extra height of the underside dimples provide flow through drainage, keeping the mat dry even where water is prevalent. You can wash these mats without moving them. Beveled edges also available in pre-cut lengths.

HONEYCOMB MAT (#A664)

Honeycomb Construction, adapted from the aerospace industry, provides the greatest strength/material advantage available. More durable scraping surfaces are an integral part of the mat construction. No raised edges to wear off. For use indoors or outdoors. Ideal for use in industrial plants, laboratories and kitchens. Red and Brown are NSF Tested.

AVAILABILITY: ½" thickness. Four stock sizes in colors of Gray, Brown, Brick Red or Tan. Mat connectors and attachable ramps are available. Connectors are used every 12".

CONSTRUCTION DETAILS: Made of Grease resistant rubber with underneath bar construction to give added cushion while eliminating creep. Large drainage holes are uniform in size, eliminating small dirt catching holes.

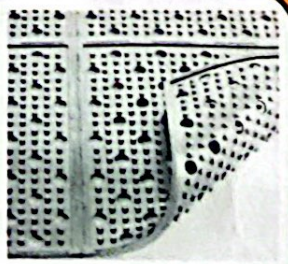
MULTI-DRAIN REVERSIBLE MATTING (#A665)



A non-tracking rubber matting that is widely used in dishwashing areas, food preparation areas, behind bars and service counters. Anti-fatigue and drainage matting which is resilient and light weight for ease of handling and cleaning.

AVAILABILITY: ½" thick in eight stock sizes.

COLORS: Black or Brown.

CONSTRUCTION DETAILS: Rubber compound with a non-skid surface, lightweight for ease of handling and reversible. The round holes with a raised knob construction give added cushion and acts as a scraping mat.
